Method of computing per day usage of library

Computerized and manual method is using to calculate the per day usage of the library. Knimbus e-library remote access system has been procured for library users to use library through e-access. In-out entry register and face recognition attendance system is using to calculate the per day user's footfall in library.

Average usage of the Library = Total no of teachers and students in each day for all working days/Total no of working days.

3. Number of Faculty and Students using Library per day

In compliance with the COUNTER Code of Practice 3, IEEE will amend the Item, Metric Report (IR) and this Master Report (MR) to better reflect usage statistics for different content types in its subscription environments. Effective with the January 2022 COUNTER reports, the "Data_Type" column in the IR and TR Reports on the IEEE MPS website will only show Journal, Book, and Other (previously Conference, Standard, or Course). In a customized COUNTER-compliant report, IEEE will add a new column called "Data_SubType" that will provide more detail on "Other". For example, if "Other" is a Conference Proceeding or Standard or Course, it will be shown in the "Data_SubType" column as "IEEEConference", "IEEEStandard", or "IEEECourse". If you access your COUNTER reports via SDR#, please make sure to update the new IR and TR Reports so they will include the amended "Data_Type" and the new "Data_SubType" column.

The screenshot shows the 'COUNTER 5 data' dashboard. It includes sections for 'COUNTER 5 data', 'COUNTER 5 data filters', 'COUNTER 5 data reports', and 'Automated COUNTER 5 data downloads'. The dashboard is divided into several panels, each containing a list of reports and filters. The 'Automated COUNTER 5 data downloads' section shows a table with columns for 'Institution Name' and 'Email'.
