- Used Syringes / Injection Vail's
- Broken Glass

CONSTRUCTION DEBRIS/INERTS

- (hand over separately)
- Rubble
- Paints
- Silt from drains
- Cement powder
- Bricks
- Flower pots

Did you know...? Nearly 95% of the household waste can be kept out of landfills if we practice the 3 R's and segregate waste at source.

REDUCE

Avoid buying single use disposables such as plastic/paper cups, gift wraps and packaged products. Many packages which are a combination of paper, foil and plastic are often difficult to recycle. Carry your own grocery bag every time you shop instead of accepting single use plastic carry bags. **Reducing the waste at source removes the need to manage it later!**

REUSE

Re-use old glass jars and plastic covers. You can give second life to your old clothes, books and electronic items by repairing them.

RECYCLE

Recycling is an energy intensive process. However, it is a better option than landfilling. Recycling helps salvage raw materials that would be lost forever if landfilled

Our vision is to manage 95% of our waste responsibly and to send only 5% to landfills

- PLS drop your Plastic & E-Waste in the central bins provided by the Institute.
- Only Reject Waste will be send to the Landfill.
- If you find someone violating waste management rules, please report to jd@aitpune.edu.in with pictures.
- For any questions regarding segregation, contact Zero Waste Team at AIT, Pune , skulkarni@aitpune.edu.in, project@aitpune.edu.in
